

jamie calabro.

With an interest in the arts that ranges from the visual to the aural and everything in between, I bring a curiosity to my work matched only by my passion to create and communicate ideas. These exploratory tendencies take root in both my personal and professional life. Coupled with my development knowledge, my dedication to design navigates my day-to-day and allows me to enjoy work as though it were play.

related work experience

'nition design 2006 - Present

My role as the nition's sole web designer and developer allows me to take projects from conceptualization through completion – working with clients such as Coca-Cola, Johnson & Johnson, Boehringer Ingelheim, Novo Nordisk, Allergan and Eli Lilly. Primary responsibilities include information architecture, visual and interaction design, identity development, SEO, and front-end development.

MTV Networks 2006

Interactive UI development and digital marketing campaigns working primarily with Adobe Flash.
